November 19, 2021

ATU Members,

NJ Transit has begun the process of implementing Governor Murphy's Executive Order 253 which requires NJ Transit workers to be fully vaccinated or submit to weekly COVID testing. NJ Transit has partnered with the testing company Vault to administer the test kits. The kits, which are saliva tests, will be mailed on a weekly basis to your current address. Instructions for performing and returning the tests are located inside of each kit. Tests are not to be performed by those who are vaccinated. If you have received a test kit and you are vaccinated, return the unused kits to your garage management. All members must be registered with the company email to submit vaccination status. If you have not activated your email, contact your Local Union representative for instructions. 30 minutes pay at overtime rate will be paid to those performing the tests after work hours. Please contact your Local Union Representative for any questions regarding this process.

In Solidarity,

Orlando Riley

Chairman/ATU NJ State Council
